

Letter Of Recommendation

To Whom It May Concern,

I am delighted to recommend Akshat Dhiman, who has been working under my supervision as a DevOps Engineer at Cognizant since August 2023. Throughout this period, Akshat has consistently showcased exceptional technical skills, dedication, and a problem-solving mindset essential for success in the fast-paced world of DevOps.

Akshat played a key role in enhancing our CI CD pipelines, improving code deployment efficiency by 40 percent through automation and seamless integration of tools. He expertly managed version control systems including Git and CodeCommit, enabling smooth collaboration across development teams. His strategic approach to containerization using Docker and Kubernetes significantly optimized resource utilization and deployment consistency.

He also developed and maintained Python applications aimed at automating Kubernetes deployment restarts and improving log management, which increased operational efficiency. Additionally, Akshat's efforts in optimizing cloud resource usage led to a 25 percent reduction in operational costs.

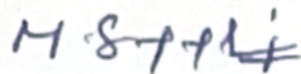

His proficiency with a wide array of tools such as CodeBuild, CodePipeline, ECR, EKS, AKS, VPC, EC2, VNET, and Storage Accounts, combined with his strong scripting skills in Bash and Python, made him an indispensable part of the team. Akshat's ability to quickly adapt to new technologies and contribute innovative ideas has had a significant positive impact on our projects.

Akshat is a collaborative and dependable team member who communicates effectively and consistently demonstrates a proactive approach to learning and problem solving. I strongly recommend him for admission to your institution and am confident he will excel and bring valuable real-world expertise to his future academic pursuits.
